

Corporate Chair Industrial Circular Economy

An **industry-oriented** chair that meets the needs of industrial sectors and member companies, in conjunction with academic, technical and institutional partners, as well as regional, national and international ones.

Missions of the corporate chair

Establishing links between industry and higher education players, students and professors

Researching technological solutions and carrying out material tests

Establishing the link between the development needs of companies' industrial strategies and technological solutions

Co-constructing and delivering scientific publications

Offering a space to collaborate, share and communicate technical and legal information

Identifying specific training needs and proposing suitable modules

R&D in industrial fields validated by the scientific committee

Covering all phases of industrial processes, from upstream to downstream; from eco-design to end-of-life material recycling

Organizing seminars and webinars for knowledge transfer

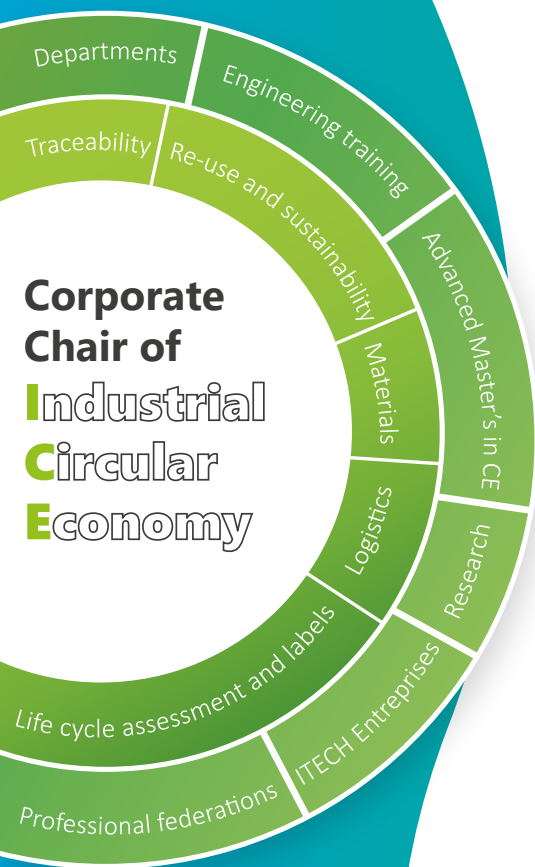

Contact: michel.lopez@itech.fr

Becoming a member will allow you to...

- **Join the ITECH network:** industrial, academic, and institutional partners; innovation centers, technical centers, the Orée association...
- **Benefit from ITECH's expertise and experience in collaborative work within the field of circular economy,** gained through its research activities, consultancy assignments, and technological services in its four core technological fields
- **Participate in the thematic working groups** initially proposed by the Corporate Chair: traceability and logistics, materials (renewables, recycled and recyclables) and re-use, and LCA (Life Cycle Assessment)
- **Prospecting new talents, gaining visibility and credibility** with students through thematic interventions in their academic programs, but also by involving them in innovative research programs
- **Participate in the development and dissemination of new skills**
- **Benefit from the connections** between the Corporate Chair and the Advanced Master's in Innovation Project Management in Circular Economy
- **Strengthening the CSR dimension** of committed companies
